University Projects

- **Online Food Delivery website on Visual Studio Code**

This project is based on HTML, CSS, & PHP. In this website customer can order food.

Project link on Github: https://github.com/shahed32156/online_food_delivery_website

- **Online Tutors website on Visual Studio Code**

This project is based on HTML & CSS. Only front-end development work has been done for UI designs.The students who are looking for a teacher to read them, they can sign up and search by typing the location in the search bar and see which teacher is willing to teach the student in this location.

Project link on Github : https://github.com/shahed32156/online_tutors_website

- **Google Classroom website on Visual Studio Code**

This project is based on HTML, CSS, JavaScript & PHP. Similar functionalities of Google Classroom website and we also integrated the chat system with Google Classroom so that teachers can communicate individually with students.Teachers will also create the group for assignment and presentation.
